SKILLS

- Python (advanced)
- Django
- Automation & Selenium
- REST APIs & scraping
- Pandas / NumPy
- scikit-learn
- HTML / CSS / JS
- Git
- SQL

LANGUAGES

Spanish	Native
English	Conversational
French	Basic

EDUCATION

Machine Learning Bootcamp
4Geeks Academy

Intermediate Java Course
SEAS Campus

ESO (2017-2020)

Python Developer

Automation, backend systems & applied data science

AVAILABLE FOR FREELANCE & CONTRACT WORK — ZURICH / REMOTE

ABOUT

Self-taught Python developer building autonomous systems, automation tools and data pipelines. Focus on backend architecture, scripted automation (Selenium, APIs, scraping) and applied data science. Comfortable working independently end-to-end, from design to deployment.

CORE STRENGTHS

Automation & Scripting

Selenium, APIs and scraping pipelines that remove repetitive manual work.

Backend & Data Systems

Django services and structured data pipelines backed by PostgreSQL.

Independent Delivery

Self-directed from architecture to deployment — comfortable owning a project end-to-end.

FEATURED PROJECTS

JARVIS P.D.

Python, LangGraph, PostgreSQL

Autonomous multi-agent system orchestrated with LangGraph; deterministic services validate and persist agent proposals against a canonical PostgreSQL state, with each development phase gated and audited before advancing.

ClonadorProfesional

Python, Selenium, BeautifulSoup, Flask

Web automation tool that captures a live site's front-end and rebuilds it locally as a functioning copy — used as the base for this same portfolio.

Gasolineras Canarias — Price Trend Pipeline

Python, Pandas, OpenPyXL

Data pipeline that downloads official fuel-price datasets and generates formatted, region-segmented Excel reports.

OTHER EXPERIENCE

Hands-on work across demanding environments — discipline and reliability built outside a screen too.

- **Junior Electrical Installer** — Tenerife, Canary Islands
- **Gardening & Outdoor Maintenance** — Germany
- **Agricultural Worker** — France
- **Logistics Operator** — Netherlands
- **Kitchen Assistant** — Various restaurants

Currently based in Zurich and open to freelance, contract and remote collaborations — reach out if there's a project to build.
